

Acquisition Brief — GeneticSovereignty.com (EN)

Proposed Asset

- **Domain name:** GeneticSovereignty.com (.com, exact-match)
- **Nature:** descriptive digital asset, designed as a **neutral banner** for the concept of “**genetic sovereignty**”: governance of genetic resources, genomic equity, community rights, control of usage and benefit-sharing.

Not included:

- no medical, genetic, diagnostic, or testing service,
- no datasets, no samples, no health/genetic data of any kind,
- no scientific, regulatory, or legal advisory,
- no certified methodology, no label, no biotech tool or software.

Contacts

- **Website:** <https://www.geneticsovereignty.com>
- **Email:** contact@geneticsovereignty.com
- **LinkedIn:** <https://www.linkedin.com/company/geneticsovereignty>

1. Purpose of this document

This brief enables an executive committee (Health, Research, Agriculture, Foreign Affairs, Ethics, Legal, NGOs, Foundations, Universities) to:

- assess the true nature of **GeneticSovereignty.com**,
- evaluate its potential as an **international banner** for genetic governance,
- understand its relevance for multilateral initiatives, observatories, indexes or coalitions,

- determine the strategic value of securing an **exact-match .com** on a critical 2025–2035 concept,
- use a **secure acquisition process**, aligned with institutional practice.

This document is not a scientific, medical, regulatory, or legal opinion.

2. What GeneticSovereignty.com is / is not

2.1 Definition

GeneticSovereignty.com is an exact-match .com domain describing the concept of:

Genetic sovereignty:

the ability of States, Indigenous peoples, communities, and institutions to **govern the use, circulation, and benefits** derived from genetic resources and genomic data.

The domain is intended as a **neutral banner** for:

- public programs (national or continental),
- international research centers / observatories,
- public-policy platforms,
- Global South coalitions / NGOs / foundations,
- indexes or dashboards dedicated to genomic equity.

2.2 What GeneticSovereignty.com is *not*

The domain is **not**:

- a DNA testing service,
- a genetic database,
- a lab or diagnostic tool,
- a sequencing or analytics platform,
- a health service,
- a certification body,
- a scientific or medical advisory service.

It is a **strategic and semantic asset**, not an operational platform.

3. Context & global milestones (2025–2035)

Several trends converge:

- expansion of large-scale sequencing infrastructures,
- emergence of the **Indigenous data sovereignty** agenda,
- increasing claims by States over biological resources and related applications,
- geopolitical tensions around biodiversity and genomic datasets,
- need for equitable **consent, governance, and benefit-sharing** frameworks,
- pressure to build unified **multilateral norms**.

In this landscape, an exact-match .com provides a stable, neutral point of convening.

4. Illustrative use cases

(Purely illustrative; non-binding.)

1. International “Genetic Sovereignty Observatory”

- global monitoring of genetic governance, rights, and policies,
- mapping inequities and genomic justice risks,
- publications, benchmarks, shared frameworks.

2. Global South coalition

- shared platform for biodiversity-rich nations,
- coordination on genetic resource governance,
- multilateral negotiations / benefit-sharing.

3. Academic / think-tank initiative

- neutral space for researchers, jurists, ethicists, health experts,
- work on equity, consent, community participation.

4. International Index or Dashboard

- **Genetic Sovereignty Index** or **Genomic Equity Dashboard**,
- indicators: autonomy, governance, equity, ethical safeguards.

5. Foundation-led global program

- banner for initiatives on genomic justice, Indigenous rights, global health.
-

5. Why an exact-match .com?

As with ComputeSolvency.com, ClimateSolvency.com, and QuantumCO2.com:

- internationally intelligible terminology for governments, institutions, boards,
 - neutrality — not tied to any brand, country, or lab,
 - defensive linguistic position: control of the governance banner,
 - durable anchor for reports, observatories, multilateral work, and coalitions,
 - credibility when dealing with scientific, legal, and policy stakeholders.
-

6. Strategic advantage

- **Single global banner** for a sensitive and fragmented domain,
 - **Institutional neutrality** in an area lacking central reference points,
 - **Immediate clarity**: two universal words → instant recognition,
 - **Timely**: governance frameworks forming now for the next decades,
 - **Flexible**: can serve as an initiative, observatory, index, coalition, public program, or neutral hub.
-

7. Legal framework & responsibilities

- The seller transfers the domain name **GeneticSovereignty.com** only.
- No medical, genetic, diagnostic, laboratory, or testing services are provided.
- No genetic, health, personal, or clinical data is processed or hosted.
- No legal, biotech, scientific, or regulatory advice is provided.

This document does **not** constitute:

- a regulated service,
 - a financial or scientific recommendation,
 - a medical or diagnostic tool,
 - an affiliation with any public authority, health agency, or multilateral body.
-

8. Standard acquisition process

1. **Initial contact & NDA**
through contact@geneticsovereignty.com.
2. **Strategic discussions**
intended use: observatory, coalition, public program, index, research portal.
3. **Formal offer**
valuation, and optional limited bundle (≤2 compatible domains).

4. **Legal & financial security**

escrow option, digital-asset transfer agreement, EU invoicing.

5. **Technical transfer**

domain transfer and DNS handover to the buyer.

9. **Specific safety notice**

GeneticSovereignty.com does not collect, store, or process any genetic, health, or personal data.

It is not a medical service, diagnostic tool, or genetic testing provider.

Any future use of this banner must strictly comply with:

- **bioethics norms,**
- **data protection laws (including GDPR),**
- **Indigenous and community rights,**
- **applicable international law.**
